

PIN-CH® foot part for tube and wooden legs – flexible, high friction

PIN-CHFHF

Flexible foot part with friction for our flexible PIN-CH® system where you choose the foot part depending on floor surface and furniture design. The foot part is mounted in the foot holder with a click and removed with, for example, a screwdriver. Suitable for chairs, among other things, with angles between 0 and 15 degrees. Available in several sizes.

Used together with foot holders [PIN-T](#) (tube) and [PIN-W](#) (wood).

The PIN-CH® system is based on the ability to easily replacing the foot part when it is worn out or when moving furniture to another floor surface. The components are marked to make it easier to find new parts.
