

PIN-CH® foot holder for tube legs

PIN-T

Foot holder for our flexible PIN-CH® system where you choose the foot part depending on floor surface and furniture design. The foot holder is mounted straight into the tube and the foot part is mounted in the foot holder with a click and removed with, for example, a screwdriver. Suitable for chairs, among other things, and is available for several tube dimensions.

Used together with [PIN-CHP](#), [PIN-CHPE](#), [PIN-CHA](#), [PIN-CHAF](#), [PIN-CHF](#), [PIN-CHFF](#) and [PIN-CHFHF](#).

The PIN-CH® system is based on being able to easily replace the foot part when it is worn out or when moving a piece of furniture to a different surface. The components are marked to make it easier to find new parts. For best use of the flexible system, PIN-T is installed according to the instructions for [PIN-CHA](#).
