

# Chair connector for sled base chair – foot mounted, felted

SCSC-KBF11

Joining brackets with felt for sled-base chairs. Mounted with screws on the underside of the tube. The chairs can be easily linked by aligning the legs in parallel and sliding the brackets together. With a slight lift, the chairs can then be pulled apart. Available for several tube dimensions.

Information about testing linked chairs can be found in EN 14703:2007.

**Note:** The brackets are sold in pairs. For a stable connection, two pairs are recommended, one at the front and one at the back. Screws are not included.
