

Adjustable foot for horizontal installation with expansion insert

SFSP-SFIPHO

Adjustable foot with expansion solution that keeps the foot securely in place. The foot is designed for furniture and shop fittings made of sheet metal, where the expansion part is fixed into rectangular holes. The screw can be adjusted using an Allen key from both above and below, as well as with a spanner at the foot section.

Note: D2 must not exceed 67 mm for the fastening to work.
