

Stacking protector / mounting bracket for chair – modular

SPSC-DK01

Combined modular fitting and bumper for chair seats. The fittings/bumpers are offered in two materials, where rPE-LD is recycled and the other has slightly higher friction. Adapted for several tube sizes and available in two heights that can be mounted in four different combinations. The fittings are removable, replaceable and recyclable. Purchased individually in the desired size to be combined as needed. For example, 8 pieces are needed for a chair with 4 mounting positions. The fittings can be combined with our Chair Link SCSC-001.

rPE-LD = Recycled

PE-LD = Higher friction (not recycled)
