

Felt glide cap

XCF-004

Furniture foot made of felt, for a sound-reducing effect. Suitable for school environments. The cap is made of PET felt, of which 50% is recycled, and it is easy to remove and replace. It is available in black and anthracite grey and can be used for both tube and wooden legs.

Note: Tube legs must be plugged before assembly, for example with IC-IF1. Depending on the felt, the appearance may vary slightly.
