

Glide cap – elastic, square, with felt

XQSF-001

These glide caps are discreet, simple and effective when protecting floors and furniture. They have a transparent and flexible cover which adheres well to wooden or steel legs, and they are easy to put on and take off. The felt is gentle on the floor and noise-reducing when furniture is moved. With a metal plate at the bottom of the cover, they are also suitable for steel tube legs without an endcap. The glide caps are available in several sizes and in two variants, round and square.

Recommended for people with straight legs

Not suitable for use on rough floors.
