Wide
standard range
and tailor-made
solutions

Plastic parts for both
small and large projects

Build

Plastic details for efficient construction

We offer smart, durable components that make assembly easier and save time. And if you need something beyond our standard range, we'll develop custom solutions together with you.

Threaded plugs, tube connectors, flange bushings

Handles, knobs & clamping levers

Self-adhesive feet & bumpers

Feet, wheels & castors

Our product range

Here you'll find plastic components for furniture, construction, and industrial design. Our standard range is filled with plastic parts in many sizes and for many different purposes. Every year, our development team creates new, unique products to meet our customers' needs.

Tailor-made plastic components

Discuss your projects with our experienced product specialists! We help you develop the tools for unique plastic parts and manufacture them for you in our own production facility.
